

INTEGRATED CAMERA REMOTE CONTROL FEATURES

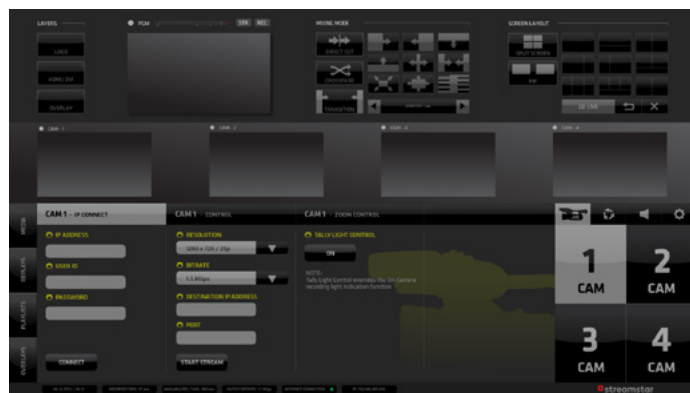

■ JVC CAMCORDERS REMOTE CONTROL

is now fully integrated in the Streamstar® software enabling the operator to adjust settings on the remote camcorder directly from the Streamstar software. This opens a whole new world of remote production possibilities.

■ TALLY LIGHTS

Streamstar® SW takes control of the JVC Camcorder functions over LAN or WiFi and allows the on-camera Recording light to be used as Tally light to indicate when the camera is switched live to PGM.

■ JVC DIRECT IP VIDEO INPUTS

Streamstar® SW features unique IP video stream inputs allowing JVC streaming camcorders located anywhere in the world to be used in live production. Global remote live production is now accessible to everyone.

■ REMOTE IP ZOOM CONTROL

The JVC camcorder Zoom function and its presets can now be remotely operated from the Streamstar® SW enabling a great variety of automated, remote production applications and a new dimension of live production.
